Election/Restrictions

1. Restriction to one of the following inventions is required under U.S.C. 121:
 - I. Claims **1-6** and **13-24**, drawn to “a CMOS image sensor”, classified in class 365, subclass 230.06.
 - II. Claims **7-12**, drawn to “a method of image sensing”, classified in class 365, subclass 230.06.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions **I** and **II** are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the particular claimed structure in invention **I** can be used in different ways other than the method of the invention **II**.
3. Because these inventions are distinct for the reasons given above and the search required for Group **I** is not required for Group **II**, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2824

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Objections

5. Claims 14-18 and 20-24 are objected to because of the following informalities:

Claims 14-18, line 1, "**A unit array**" should be "**A CMOS image sensor**"

Claims 20-24, line 1, "**A unit array**" should be "**A row decoder of a CMOS image sensor**". Appropriate correction is required.

Abstract

6. The Abstract is objected to because of the following informalities: the phraseology such as "**The present invention**" can not be used.

Appropriate correction is required.

Drawings

7. Figures **1-9** should be designated by a legend such as **–Prior Art–** because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
